# Important Patient Information

Case photos compliments of Dr. Andy Hayes of St. Louis, MO

The CS5<sup>®</sup> is one the industry's premier devices for correcting Class II, Class III, and midline deficiencies. Used by hundreds of clinicians world-wide, it has proven itself over and over to help achieve the results that both you and the doctor are hoping to achieve. Validated by extensive testing and clinical research, and published within industry journals, the CS5<sup>®</sup> is sure to assist your treatment in producing a lifelong positive outcome. Traditional elastic rubber bands are prone to wear out, while the CS5<sup>®</sup> is designed to work 24/7 without wearing out. The low force modalities of the thermal nickel titanium springs are sure to provide you with a comfortable experience and a full range of mouth movement.

## Tips for **SUCCESSFUL** treatment

In order to optimize the effectiveness of the CS5<sup>®</sup> Corrector, DynaFlex<sup>®</sup> highly recommends following the advice of your orthodontist and offers a few simple tips to aid your success.

*Tip 1*

Advise your orthodontist of all pertinent bio health info.

*Tip 3*

Perform regular light brushing and rinsing of the springs to keep them clean and free of food debris.

*Tip 2*

Do not open your mouth excessively wide. Perform "soft" yawning with your mouth slightly open.

*Tip 4*

Talk, sing, and chew away... it will make treatment move along faster!

## The *Results* Matter...

The CS5<sup>®</sup> is a highly effective, low force system used to treat misaligned bites. This system requires minimal effort and guarantees success. People just like you have gotten these results!
